CLOSE TO THE DEAD – Scheduled for this year

Raising one's hands down existentially once is a definite degenerative disorder (a cluster B factor). The degeneracy of raising one's hands down existentially twice should be listed as a DSM 5 genetic and mental disorder, and the inability to raise one's hands existentially as "imbecilic throughput schizophrenia"—ade ronke

On January 7th 2026, I was stalked, harassed and arrested by the state police. The reasons for this is, in my view, the intellectual and daring proclivities in my book, *A Case in Point*. There are other reasons to be stated in this book. If every indication of my life doesn't suggest this to you my readers, it is calling it: if I wasn't to be me. would I not be dead? But I am cognizantly alive by my own recognizance. In other words I was arrested for being who and what I am.

What is to follow is false imprisonment, and a true story of great injustice and ceaseless attempts at cover up while I meet unsavory criminals along the way. If this hadn't happened to me, I couldn't have conceived of it. It happened to me. I must go beyond mere conceptions

You may choose to donate whatever you may through lomopeju@protonmail.com paypal handle. And you may put your support into the love and enjoyment of music at [rillmusic on Bandcamp](#). Thank you.

Author's Note

My readers, wherever you are in the world, it would be far from ideal or humane to ask you to treat Open Knowledge merely fractionally as you treat OPEN-AI. Only one of the two, like mine, is human. Support my cause, a voice of insight, reason and knowledge in the age of #Modern AI systems. Support the human cause.

If this work connects with you intellectually, spiritually, emotionally, or in any other way personal, it is free. If it doesn't, and you're rather of a different preference and won't ever come back to my works. It is free as well. Graces. I have never sought to run the world or rule it. Not my thing. I do seek to connect with humanity and make cross generational differences with practical, emotional and spiritual intelligence—matters connecting humanity and saving lives like mine against the odds life brings that I do know about intimately. Works are usually accounts of life, nature, science, politics and more in experiential reality. It is a privilege to be alive despite what I have been through. And I don't intend to take this deserved privilege lightly.

The work as well as others like it can be found on my website available free at www.edewlogics.com. To support free works like this and others available on my site, [please support the free books for life cause](#). Thank you.

On the Question of Lunar Dexterity

I am posting this after the Moon Mission 2023 reentry. NASA deserves all the praise and admiration before things return to normal. I have two main concerns, my readers, not just for NASA but for the intellectual body politics of the world at large. That said, I have seen a few photos being flaunted by the common fool (a name they have earned after imprisoning me for my intellect and trying everything to cover it up, including torture). That is what the book *Close to the Dead* is about. To be released this year. Please support the publication. I need to be saved from these genetic degenerate, evil, lowlife common fools who steal life, labor, and liberty. In case no one read that, I repeat, I need to be saved from existential and labor thieves. Now, two very important questions about this 2026 moon mission.

- **1.** You have seen some of the pictures depicting the so-called illusions of the dark side of Earth and of the Moon. There is no doubt in my mind that these are from orbital perspectives. For instance, you can also see that the moonshine is a reflective surficial quality that can only be seen at night or in the late afternoon. So much for all the lunar men with too many shifts and too many perspectives. Too many nonexistent eyes. I surmise the moon has no capability for water. If there is such a thing on the so-called dark side, cold or otherwise warm water. I want to see it especially in 2028. I could be wrong, but there is no life-enabling essential element on the moon. You can not say it is living. Not in the same sense as you say Earth is, despite all the deeply set scientific lies about Earth and Earthian existentials. Something to look forward to. no doubt. Otherwise, you can, if you choose to, especially say it is dead. The question? Is the "dark side " a theoretical phenomenon other than gravitational propensity and orbital vectoral perspective? For instance, my intelligent readers,

who will never imprison anyone for their intellect and profess sanity or intelligence, why do you think there was no communication from Earth during the 40 minutes or so on the so-called "dark side" of the moon?

- **2.** This is the most essential question. Again, from the photos, the common fools, (Should it rather be lunar men?) have been flaunting some photos. These are photos of both the moon and the Earth. But with insightful and knowledgeable physics, one should be able to answer a simple question with verifiable rationality. This is not just for NASA, but for any intelligent body in the world. My readers, given #1, the first question: Is the Earth above the moon or is the moon above the Earth? This is an important question

My readers, physics is my love and I am not letting go. Mathematics is a parallel parasymbiotic parasite. I love IT too. Relative to the differentiating x , all Y 's are mathematical. Please support my work for humanity, intelligence and no doubt sanity.

Author's Note

It is important to me that you support the free books for life cause or give your support through music by ril. Please do so if you can afford to do so. Thank you.
